DETAILED ACTION

Claims 20-23 are pending in the instant application. Claims 1-22 and 24 are canceled.

Response to Final Action

Applicant's response and amendment to the claims filed on 06/05/2007 are acknowledged. The rejections and objections made in the previous office action are withdrawn in view of the terminal disclaimer filed on 06/05/2007.

Reasons for Allowance

The present invention is directed to a stable disodium salt of fosfluconazole in the form of its trihydrate, its hexahydrate, or as a mixture of tri- and hexahydrates, wherein the trihydrate has a water content of about 11% w/w and the hexahydrate has a water content of about 20% w/w or wherein said mixture has a water content from about 11% w/w to about 20% w/w.

The closest prior art of record is U.S. Pat. No. 6,977,302 (Green et al.), which teaches an alkali metal salt of 2-(2,4-difluorophenyl)-1,3-bis(1H-1,2,4-triazol-1-yl)-2-propyl dihydrogen phosphate. The difference between the instant claims and the prior art is the hydration state, which is an obvious difference. Applicant has filed a terminal disclaimer to overcome this obviousness double patenting rejection.
